Proceedings

8th International VDZ Congress

26 – 28 September 2018
Duesseldorf

2018
## Content

**Foreword**  
5

**Keynote Session**  
6
The Cement Plant of the Future - Innovation and Technical Trends in Cement Production  
Albert Scheuer, HeidelbergCement  
7
Technical Trends and Innovation in the Construction Sector  
Jérôme Stubler, VINCI Construction  
Concrete and its Digital Fabrication  
Robert Flatt, ETH Zurich  
The Cement Industry on the Way to a Low Carbon Future  
Martin Schneider, VDZ  
The Global Cement and Concrete Association: One Global Cement and Concrete Voice  
Frank Rossini, GCCA  

**Session: Digital Measures and Projects**  
82
Big Data Analysis in the Cement Industry  
Fokion Tasoulas, TITAN Cement Group  
Digital in Heavy Building Materials – Starting the Transformation at HeidelbergCement  
Roman Lentz, HeidelbergCement  
Digitalization – Leverage Operational Efficiency in the Cement Industry  
Yun Zeng / Ömer Oydasik, Siemens  
Industrial Internet of Things – A Roller Mill Solution as an Example  
Georg Locher, thyssenkrupp Industrial Solutions  
Digital Transformation: A Survey of the German Cement Industry  
Max Ellerich, RWTH Aachen  
How to Approach Data Evaluation in the Cement Industry Systematically  
Philipp Fleiger / Martin Schneider, VDZ  

**Session: Sustainability and Climate Change**  
144
Max Captive Power and Clinker Production  
Albrecht Wolter / Jessica Thiess, TU Clausthal  
Calix Process CO₂ Separation Technology and the LEILAC Project  
Phil Hodgson, Calix  
Verifying the Potential of Integrated Calcium Looping for Low- CO₂ Cement  
Stefano Consonni, Politecnico di Milano  
Conversion of CO₂ - A Techno-economic Assessment  
Remi Chauvy, Université de Mons (UMONS)  
Low Carbon Energy and Feedstock for the European Chemical Industry  
Kurt Wagemann, DECHHEMA  
CO₂ Emission Reduction by Using CO₂ from the Cement Industry: Myths and Facts  
Carlos Abanades, Consejo Superior de Investigaciones Científicas (CSIC)
Session: Environmental Protection Measures
HD-SCR Kiln 2, Goellheim plant – Course of Action, Concept and Operational Experiences
Rüdiger Matheis, Dyckerhoff
The Research Progress on NH$_3$-SCR Technology and its Application in China
Wang Lan, China Building Materials Academy CBMA
Emissions Reduction by Means of Efficient Combination of DeCONOX, Xmercury and Sludge Drying Systems
Jürgen Thormann / Richard Morris, Schwenk Zement
Mercury Balances in the Cement Industry
Stefan Schäfer / Volker Hoenig / Robin Harraß, VDZ
Continuous Process Gas and Mercury Emission Monitoring
Felix Bartknecht, SICK

Session: Grinding Technology
Trends in Grinding Technologies (Report from VDZ's Working Group Grinding Technology)
Michael Müller-Pfeiffer, Dyckerhoff / Philipp Fleiger, VDZ
Wide Range of Applications – Operational Results of MVR Mills
Caroline Woywadt, Gebr. Pfeiffer
Grindability Investigations of Innovative Cement Composite Materials in VRM-Grinding Plants
Winfried Ruhkamp, Loesche
Nuh Çimento’s Largest Upgrade Project in Europe with KHD Roller Press Technology
Ilker Avci, Nuh Çimento
Separate (Ultra-) Fine-Grinding of Cement
Kevin Treiber, VDZ

Session: Burning Technology
Waste Heat Power Generation – From Concept to Operation
Cristian Voinitchi / Michael Principato, HeidelbergCement
Investigations on Alternative Fuel Combustion at the Main Firing
Nils Bodendiek / Stefan Schäfer, VDZ
Drying High Moisture RDF at Souselas
Francisco Leitão, Cimpor
Retrofitting the Duna-Dráva Cement Plant in Vác for Higher AFR Utilization Demonstrating Improved Environmental Performance
Zsolt Szilágyi / László Szabó, Duna-Dráva Cement
5 Years Operational Experience with the Prototype Prepol-SC
Florian Trela, Holcim (Deutschland)
Capacity Boost and Energy Savings – With Counter Current Heat Exchanging Cyclone
Mads Nielsen / Anders Skærlund Petersen, FLSmidth
Session: Cement and Concrete

LC3 – Limestone and Calcined Clay Concrete
Karen Scrivener, École Polytechnique Fédérale de Lausanne (EPFL) 469

CSA Cement in China
Sui Tongbo, Sinoma 503

Progress in the Development of Ternocem – A Belite Yeélimite Cement
Wolfgang Dienemann, HeidelbergCement 526

Recarbonation of Concrete – Climate Benefit and Environmental Issues
Jesper Sand Damtoft, Aalborg Portland 541

Solidia Technologies – An Example of Carbon Capture and Utilization
Vincent Meyer, LafargeHolcim 553

Performance-based Specifications for Concrete
Christoph Müller, VDZ 563

Please cite the proceedings of the 8th International VDZ Congress 2018 as follows:

Name of the author(s): Title of the presentation.
