Content

Foreword 7

General Reports 9
Fit for Purpose Market-oriented Cements 10
Jesper Sand Damtoft, Duncan Herfort

Raw Material Extraction and Grinding Technologies 15
Giovanni Battista Auxilia

Burning Technology 21
Rainer Nobis

Environmental Technology and Sustainability 34
Eamon Gergley

Theme Session: Future-oriented Projects 39
Presentation of the new Greenfield Plant – 12,000 TPD clinker, FLS Technology – Holcim (US) Inc. at Ste. Genevieve, Missouri, USA 40
Jacques Bourgon

First Experiences with the new Kiln Line in Woessingen 46
Gerard Kirschner

Aditya Birla Group – Trust in Large Capacity Plants 50
Brijesh Gangwar, P.V.R. Murthy, Andreas Hand

Klin Project and first Experiences at Beremend Cement Plant 56
László Szabó, Tibor Csoerege, Thomas Braig

Buehler White Cement Line, Challenges and Achievements 63
Emiliano I. Quiroga Morales, José de la Vega

Vertical Cement Grinding with the Polysius Mill – Concept and Industrial Realisation 72
Robert Schnatz, Frank Ruoss

Theme Session: Cements 77
Trends in the Field of Low CO₂ Cements 78
Albrecht Wolter

Control of Product Quality during the Use of Secondary Materials 83
Hendrik Moeller

Production and Properties of Composite Cements 89
Horst-Michael Ludwieg

Experience with the Production of Chromate Reduced Cements and Cement Containing Preparations 96
Walter Wassing

Cements and Innovation 104
Karen Scrivener

Interaction of Cement with modern Concrete Admixtures 108
Roberta Maggiotto

Theme Session: Raw Material Extraction and Grinding Technologies 113
Environmentally Friendly Mining of Raw Materials 114
Juergen Thormann, Stefan Schaefer

Modern Raw Material Preparation of Chalk – Get out of the wet? 121
Michael Kapphahn, Burkhard Wolf

Latest Technology for Lafarge French Flagship 126
Christophe Bouf

Development and Experiences with Wear Protection on Roller Presses 130
Gerhard Gudat, Otto Menner

Best Practice Ball Mill Optimisation within CRH 136
Colin Hofler

Optimisation of the Ball Charge from Mills for Cement Grinding 140
Stefan Woywadt, Philipp Fleiger
Theme Session: Subsustainability and Use of Energy

Energy Efficiency of Cement Plants
Klaus Bauer, Volker Hoennig

IEA/CSI Technology Roadmap for the Cement Industry
Cecilia Tam, Rob van der Meer

CO₂ Emission and Energy Consumption of the Cement Industry
(WBCSD/CSI-GNR)
Bruno Vanderborght

Experiences of Cement Sector Action through the
 Asia Pacific Partnership on Clean Development and Climate
Yoshito Iizumi, Tohio Hosoya

Waste Heat Recovery Power Generation (WHRPG) for Cement Plants
Tatsuo Ino

Waste Heat Power Generation at HeidelbergCement
Jan Theelen

Waste Heat Recovery for the Drying of Sewage Sludge
Johann Trebswalder

Theme Session: Burning Technology

Burners for Alternative Fuels Utilisation – Optimisation of
Kiln Firing Systems for Advanced Alternative Fuel Co-firing
Ruediger Wirthwein, Bernhard Emberger

Optimisation of the Combustion of Secondary Fuels by O₂ Enrichment
Christopher Ehrenberg, Tilo Meisner, Stefan Lanx, Markus Weibel,
Dirk Oberschelp, Ralf Schaefer, Peter Wrampe

Criteria for the Selection of Precalciner Kilns
Stefan Schaefer, Volker Hoennig

Experiences with Retro-fitting of Planetary and
Rotary Coolers to Grate Coolers
Thomas Braig, Ulrich Mrowald, Holger Rosemann, Marius Seglias

Innovations in Kiln Gas Bypass Systems
Stefan Federhen

Key Aspects for Refractory Performance in Waste Fuel Operated Cement Kilns
Hans-Juergen Kilschat, Ulrich Zielinski

Theme Session: Environmental Technology

BAT in the European Cement Industry, Outcome of the BREF Revision –
Dust, NOₓ, Abatement, Energy Efficiency, Trace Elements,
Alternative Fuels and Materials
Claude Lorea

Reverse SCR System for NH₃ Removal on Semidry Kiln
and its new Placement in the Dry Process
Giovanni Cimit, Eugen-Dan Cristea, Fabio Ferrari and Carlo Ferrario

Monitoring of Mercury and its Behaviour in the Clinker Burning Process
Martina Oertter, Stefan Schaefer

CO₂ Capture and Storage – an Option for the Cement Industry?
Volker Hoennig

Oxy-fuel Combustion and CO₂ Capture Technology for Cement Kilns
Stefan Lanx, Kristina Koring, Volker Hoennig

CO₂ Storage and Transportation –
A must in Power Generation and an Opportunity for other Industries?
Christian Bernstone

¹⁴C-Method for Biomass Determination and its Potential
to be applied at Stacks
Rob van der Meer, Martin Oertter
